Professional Summary:

DevOps Engineer with 11+ years of experience in cloud infrastructure, CI/CD automation, containerization, and release management. Experienced in AWS, Azure, Terraform, Kubernetes, and Jenkins, with additional expertise in Power BI, ADF pipelines, Databricks, dbt, and Snowflake. Skilled in building automated, scalable cloud platforms and enabling data-driven analytics through modern BI solutions.

Core Skills:

- Cloud : AWS, Azure
- Infrastructure as Code: Terraform
- Containerization: Docker, Kubernetes
- Configuration Management: Ansible
- CI/CD: Jenkins, GitHub Actions, Azure DevOps
- Programming: Java, Python, Bash
- Monitoring: Prometheus, Grafana, ELK
- Artifact Management: Nexus, JFrog
- Databases: MySQL, Snowflake
- Web Servers: JBoss, Wildfly, Nginx
- Build Tools: Maven, Gradle, Ant
- Ticketing: ServiceNow, Jira
- Operating Systems: Linux, Windows, Ubuntu

Work Experience:

Kenvue
Lead DevOps Engineer | September 2023 – December 2025 On-Shore (USA)

Key Contributions:

- Built dbt models to standardize and automate analytics transformations.
- Developed ADF pipelines orchestrating data ingestion into Snowflake and Databricks.
- Built Power BI dashboards for executive reporting using Snowflake and Azure SQL.
- Designed CI/CD pipelines using Jenkins, improving release automation and deployment reliability.
- Managed containerized workloads using Kubernetes on AWS (EKS).
- Implemented Infrastructure as Code using Terraform and Ansible.
- Implemented monitoring using Prometheus, Grafana, and ELK stack.

- Designed centralized log management using Elasticsearch, Logstash, and Kibana.
- Strengthened infrastructure security through RBAC, SSL/TLS, and vulnerability assessments.

GSK

SRE | April 2022 – June 2023 Off-Shore (India)

Key Contributions:

- Provisioned and managed cloud infrastructure using Terraform across AWS and Azure.
- Managed AWS services including EC2, S3, VPC, and EKS.
- Automated infrastructure configuration using Ansible Playbooks.
- Built Jenkins pipelines for microservices deployment using Docker and Kubernetes.
- Implemented environment segregation (DEV, QA, PROD) using Terraform workspaces.
- Configured monitoring using Prometheus and Azure monitoring tools.
- Managed bot runner infrastructure across AWS and Azure environments.
- Implemented automated patch reporting and compliance reports for audit teams.
- Used CyberArk for privileged access management in production environments.
- Collaborated with development teams to troubleshoot performance and reliability issues.

Amphora Software Pvt Ltd

DevOps Engineer | April 2015 – March 2022 Off-Shore (India)

Key Achievements:

- Designed CI/CD pipelines with Jenkins and GitHub, reducing deployment time by 80%.
- Automated AWS infrastructure using Terraform.
- Implemented Ansible configuration management for application deployments.
- Managed AWS services including EC2, S3, VPC, Route53, Load Balancers, and Auto Scaling.
- Implemented centralized logging and monitoring using Splunk.
- Integrated Selenium test automation into CI/CD pipelines.
- Migrated source code from TFS to GitHub and modernized build processes.

SkillFarm

Java Developer | March 2014 – April 2015 Off-Shore (India)

- Developed Java-based applications for data processing and automation.
- Implemented MVC architecture and data access layers.
- Built features using Java Mail, SMTP, and Excel libraries.
- Collaborated with cross-functional teams to deliver application features.

Certifications:

AWS Certified Solutions Architect Associate | AWS | July 2023
Azure AZ-900 |Microsoft | March 2023
AWS CSAA | Udemy | June 2022
GitHub Actions | Udemy | May 2022
CS DevOps | Simplilearn | Oct 2019

Qualification:

Master of Technology in Software Engineering | April 2014 | JNTU, Hyderabad.
Bachelor of Technology in Computer Science Engineering | April 2011 | JNTU, Hyderabad.
