Career Objective

Lead DevOps Engineer with 11+ years of experience designing scalable cloud infrastructures, implementing CI/CD pipelines, automating deployments, and building enterprise-grade observability systems. Strong expertise across AWS, Azure, Kubernetes, Terraform, Jenkins, ELK, and Databricks. Proven track record of improving delivery speed, reducing operational costs, enhancing system reliability, and enabling data-driven decision-making through advanced analytics pipelines.

Core Skills

Work Experience

Senior DevOps ML/Ops Engineer — DXC Luxoft

June 2026 – Till Date · Client: S&P Global

Key Achievements

- Improved software release efficiency by implementing optimized CI/CD pipelines using GitHub Actions, enhancing deployment reliability and speed.
- Reduced troubleshooting time by establishing end-to-end observability with Prometheus, Grafana, and Elasticsearch.

Responsibilities

- Designed and maintained enterprise CI/CD platforms using GitHub Actions and Jenkins.
- Implemented infrastructure automation using Terraform across AWS environments.
- Managed Kubernetes platforms including Amazon ECS.
- Developed reusable Terraform modules and standardized infrastructure provisioning.
- Designed VNET-integrated GitHub Actions runner infrastructure for controlled enterprise workloads.
- Implemented monitoring and observability using Splunk.
- Established SLO-oriented monitoring and operational practices.

- Integrated security tooling such as Snyk and SonarQube into CI/CD pipelines.
- Automated cloud infrastructure, application deployments and operational processes.
- Worked across cloud and on-premises environments to standardize infrastructure and deployment practices.

Lead DevOps Engineer — Kenvue

September 2023 – December 2025

Key Achievements

- Improved software release efficiency by implementing optimized CI/CD pipelines using Jenkins.
- Enhanced analytics workflows by building reusable dbt models and scalable ADF pipelines.
- Reduced troubleshooting time through Prometheus, Grafana and Elasticsearch observability.

Responsibilities

- Built dbt models for data transformations.
- Developed and optimized Azure Data Factory pipelines across Snowflake and Databricks.
- Designed Power BI dashboards connected to Snowflake and Azure SQL.
- Implemented Jenkins CI/CD pipelines and reduced manual interventions.
- Managed containerized applications with Kubernetes.
- Drove Infrastructure-as-Code adoption using Terraform and Ansible.
- Implemented monitoring and alerting with Prometheus, Grafana and ELK Stack.
- Strengthened cloud security with RBAC, TLS/SSL and security audits.
- Managed Docker workloads on AWS EKS using Linux, Bash and Git.
- Integrated Elasticsearch for log search, index optimization and query tuning.
- Built centralized ELK log management for multi-source ingestion and enrichment.
- Collaborated with cross-functional teams to establish APM/BPM alerts and improve system visibility.

Technical Lead — Wipro Software Pvt

April 2022 – June 2023 · Client: SRE at GSK

- Automated Azure provisioning using Terraform and improved consistency across environments.
- Strengthened application reliability with Prometheus, Log Analytics and alerting automation.
- Built Databricks notebooks and workflows for large-scale data processing into Snowflake.
- Integrated dbt with CI/CD for automated testing and deployment of data models.
- Designed Power BI dashboards for cost optimization and executive insights.
- Automated multi-environment AWS and Azure infrastructure using Terraform workspaces.
- Managed AWS EC2, VPC, S3 and networking configurations.
- Developed Python utilities for infrastructure tasks, log analysis, monitoring, reporting and deployments.
- Managed enterprise Java/J2EE applications across Windows and Linux.
- Managed configuration using Ansible and automated Windows patching reports and Azure backups.
- Implemented Prometheus Adapter for Kubernetes metric extensions.
- Managed EKS-based Control Rooms for scalable bot-runner operations.
- Used CyberArk for secure operations and access management.
- Conducted POCs for GitHub Actions automation of bot-runner machines.

DevOps Engineer — Amphora Software

April 2015 – March 2022

- Migrated applications from JBoss EAP to WildFly and upgraded Java from 1.6 to OpenJDK 14.
- Managed 10,000+ Splunk forwarders across Linux and Windows.
- Migrated source code repositories from TFS to GitHub.
- Built CI/CD pipelines using Jenkins, GitHub Actions and Bamboo.
- Managed AWS Route53, ELB, Auto Scaling, Lambda, DynamoDB and CloudWatch.
- Automated infrastructure using Terraform and shell scripts.
- Configured applications with Ansible Playbooks.
- Integrated Selenium tests into CI/CD for post-deployment verification.
- Automated Nginx configuration and monitoring.
- Integrated logs through Splunk DB Connect and tuned ingestion.
- Deployed applications using WildFly, JBoss and Tomcat and created installers using Advanced Installer.
- Built Ant, Gradle and Perl automation, deployment and build scripts.

- Worked with Nexus, Archiva and NuGet artifact repositories.
- Managed Docker Swarm/Kubernetes clusters and performed containerization POCs.

Java Developer — SkillFarm

March 2014 – April 2015

- Developed a Java application for reading and filtering Excel data.
- Used SMTP, Java Mail and JXL libraries for email automation.
- Implemented MVC architecture and handled design and data-access layers.
- Worked extensively with Java for data retrieval, querying, storage and manipulation.
- Translated technical specifications into code and documentation.
- Analyzed business applications and identified opportunities to enhance functionality.
- Collaborated with cross-functional development teams on evolving client requirements.

Certifications

- [AWS Solutions Architect – Associate](#)
- [AZ-900](#)
- [GCP](#)
- [AWS CPE](#)
- [AWS CSAA](#)
- [GitHub Actions](#)
- [CS AWS](#)
- [CS DevOps](#)

Education

- **M.Tech, Computer Science (2014)** — Samskruthi College of Engineering and Technology, affiliated to JNTU, Hyderabad

- **B.Tech, Computer Science (2011)** — Maheshwara Engineering College, affiliated to JNTU, Hyderabad
